

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	09 july 2025
Team ID	
Project Name	DarshanEase
Maximum Marks	

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration using email and password User profile creation
FR-2	User Authentication	User profile creation Login using email and password Secure password validation JWT authentication system
FR-3	Temple Discovery	Search temples by location or name View temple details, images and facilities Browse temples by category
FR-4	Darshan Slot Booking	Select temple and available slot Enter visitor details Confirm Darshan booking
FR-05	Online Donations	Confirm Darshan booking Donate to temples securely Payment processing through payment gateway
FR-6	Temple Organizer Dashboard	Manage temple details Schedule Darshan slots View booking statistics
FR-7	Admin Dashboard	Monitor users and temples Manage organizers View system analytics

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system should provide a simple, intuitive and user-friendly interface for devotees of all age groups.
NFR-2	Security	User data and transactions must be protected using secure authentication, encrypted communication and JWT authorization.
NFR-3	Reliability	The system should handle multiple concurrent bookings without data loss or system failure.
NFR-4	Performance	The application should load quickly and process bookings efficiently even during peak temple visiting hours.

NFR-5	Availability	The system should be available 24/7 so devotees can book Darshan slots anytime.
NFR-6	Scalability	The platform should support increasing number of users, temples, and bookings without performance degradation.
