

Project Design Phase
Proposed Solution Template

Date	08 july 2026
Team ID	
Project Name	DarshanEase
Maximum Marks	

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Devotees visiting popular temples often face issues such as overcrowding, long waiting queues, lack of reliable temple information, and inconvenient donation methods. These problems make temple visits stressful and unorganized.
2.	Idea / Solution description	DarshanEase is a digital platform that allows devotees to discover temples, book Darshan slots in advance, and make secure online donations. The platform also provides temple details, facilities, and schedules while enabling temple organizers to manage bookings and crowd flow efficiently.
3.	Novelty / Uniqueness	The uniqueness of DarshanEase lies in its centralized platform that integrates temple discovery, digital Darshan slot booking, donation management. It combines modern web technologies with spiritual services to improve the pilgrimage experience.
4.	Social Impact / Customer Satisfaction	DarshanEase improves the temple visiting experience by reducing overcrowding, saving devotees' time, and ensuring transparency in temple donations. It provides a convenient and organized way for devotees to plan their spiritual journeys.
5.	Business Model (Revenue Model)	The platform can generate revenue through small service fees on premium Darshan bookings, optional donation transaction charges, temple organizer subscriptions for management tools, and partnerships with travel or pilgrimage service providers.
6.	Scalability of the Solution	DarshanEase is built using scalable web technologies (React, Node.js, MongoDB) which allow the platform to support a growing number of users, temples, and bookings. The system can expand to include thousands of temples across different regions.
